

Adaptive Shape-Base Autorouter **ELECTRA Version 4.55**

Hier einige beeindruckende Verbesserungen: More Speed = more productivity !

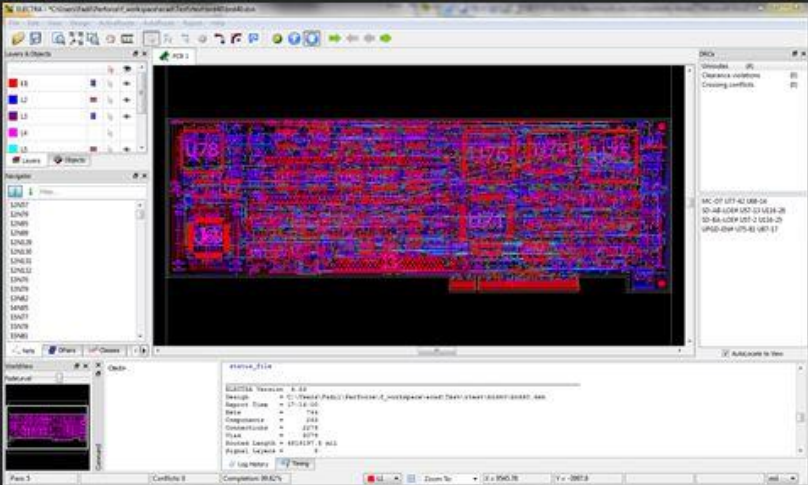

v1.7.4
18 min - 95.56 % - 101 unroutes

v2.9.6
11 min - 96.18 % - 87 unroutes

v4.55
8 minutes - 100% - 0 unroutes

The image displays three sequential screenshots of the ELECTRA autorouter software interface, illustrating the progression of routing completion over time. Each screenshot shows a top-down view of a complex PCB layout with various components and traces. The bottom status bar of each window provides key performance indicators: routing time, completion percentage, and the number of unrouted items. The first screenshot (v1.7.4) shows a routing time of 18 minutes, 95.56% completion, and 101 unrouted items. The second screenshot (v2.9.6) shows a routing time of 11 minutes, 96.18% completion, and 87 unrouted items. The third screenshot (v4.55) shows a routing time of 8 minutes, 100% completion, and 0 unrouted items, indicating a fully routed board.
